

# L.M. Equipment & Design, Inc. Snubber

**L.M. EQUIPMENT**  
& Design, Inc.

## About L.M. Equipment

L.M. Equipment & Design manufactures truly productive, rugged, coil processing components. We have a full service manufacturing facility with in-house engineering, machine and assembly departments, and an expert technical staff to design and manufacture a wide range of coil processing equipment from a single line component to a complete line. The best way to show our leadership is through practical problem solving capabilities and profitable performance.

L.M. Equipment is dedicated to designing and building machinery and systems that meet the steel industries most exacting standards and hard use. L.M.'s classic manufacturing methods and ultra rigid construction

## Custom Designed Snubber Designed By L.M. Equipment & Design

½ Thick x 84" Wide Capacity,  
20" Diameter Roll Size

## Standard Snubber Features

- ◆ Capacity Up To 5/8" x 84" Wide
- ◆ Hardened Steel Or Urethane Covered Rolls with Banding Slots
- ◆ Hydraulic Drive
- ◆ Dual Hydraulic Drive
- ◆ Heavy Welded Steel Construction

Whether you need a standard coil processing line component, or a complete line, L.M. Equipment has the capability to design it, build it, deliver it on time, and get it operating efficiently within established budget parameters. Each component we develop becomes a pre-engineered, performance proven product to maximize your present processing facility, or for use in future lines. The technical staff at L.M. Equipment is ready to help you.
